## Marketplace « Awake »

---

An NFTs marketplace, one of the first in France, will be created around the \$FIVE token.

This marketplace wants to be as accessible as possible for investors by proposing lower fees and therefore more interesting than competing platforms, as well as for buyers (to facilitate the handling of the interface for artists, still for some of them unaccustomed to the evolution of digital technology, and to allow them to take full advantage of their rights, which are often violated by various parameters that are external or unknown to them).

This will also create volume on the token and therefore generate passive income for the holders of \$FIVE.

# Uses of the \$FIVE

---

The long term will see the birth of a Play-to-Earn game.

This game will allow you to earn \$FIVE tokens and generate income through our Marketplace and the trades you can make there.

Currently in reflection, we are looking for graphic designers and developers, do not hesitate to contact us !
